## PVC Transfer Hose

### Included Products

PVC smoothbore tube with clear PVC helical reinforcement  
Diameter: 1"  
Weight per ft: 0.27

### Statement

This product is intended to assist with water management and transfer in ice water extraction in temperatures between 25°F and 150°F.

### Materials

PurePressure declares that these hoses are manufactured with Polyvinyl Chloride (PVC). PVC is a synthetic polymer that is lightweight, has strong barrier properties for the preservation of food, and imparts no taste or taint to foodstuffs. The construction of the hose consists of all PVC (a smooth PVC tube with a rigid PVC helix reinforcement and a smooth PVC cover). This material complies with 21 CFR 177.1980 for substances for use as basic components of single and repeated food contact surfaces.

### Disclaimers

PurePressure recommends that after ice water extraction to remove any excess fluid from the hose and thoroughly clean before each use.

It is the responsibility of the processor that the article is suitable for the intended purpose.
